

# THE 1<sup>ST</sup> VIRTUAL REALITY IN YOUR CLINIC

## What is DIONavi. VR?

DIONavi. VR enables your patient to fully understand what is involved in having dental implant surgery with a first hand interactive experience using the latest VR device.

After your patient has seen what is involved with a traditional flap, highly invasive implant surgery and then comparing it with the DIONavi flapless non-invasive surgery, your patient will be able to make a confident and compelling choice to choose DIONavi over other surgeries and thus improve the value of your clinic substantially!

### \* Package Component

VR headsets + Controller + DIONavi. VR video

### \* DIONavi. VR First Content

VR First Content is an interactive virtual surgery video that compares the DIONavi. flapless surgery to traditional flap invasive implant surgery.

※ With the purchase of DIONavi VR all future VR content will be provided at no additional cost.  
New VR content will be produced on a regular and timely basis.
